

Detachers

Cross Point offers three detacher models for convenient detachment of hard tags: the Code Lock, the PRIMUS and NEXUS RF.

The Code Lock and PRIMUS models are stand-alone detachers without CrossCONNECT features.

The NEXUS RF Detacher is a combined tag detector and detacher which can be connected to Cross Point's web based Integrated Loss Prevention Platform, called CrossCONNECT.

When connected, the NEXUS RF detacher counts each detachment and stores this detachment as a time-stamped event. If detachments occur outside opening hours, a notification can be sent. The quality of the hard tags is checked constantly.

Reports can be sent to your mailbox and information can be flexibly integrated into existing management information systems. Remote maintenance guarantees optimum operation at minimum cost.

Unique features

9000 gauss release force

Lockable with key to prevent unauthorized detachments

Tag detection with LED-light ring for tag testing (NEXUS)

CrossCONNECT enabled (NEXUS)

Cross Point Detacher Line
